Subject: RE: Slides- Seralini Publication

We are "connected" but did not write the letter or encourage anyone to sign it.

Considered doing this already- but I was uncomfortable even letting shareholders know we are aware of this LTE... It implies we had something to do with it- otherwise how do we have knowledge of it?

I could add "Aware of multiple letters to editor including one signed by 25 scientists from 14 countries" if you both think this is OK.

We are being asked to keep internal correspondence down on this subject.

Dan

Consider adding a bullet regarding - 25 scientists from 14 countries respond with letter to the editor.

Yong-

I do realize this has more graphics than Phil may want- but we will undoubtedly need to brief others on the subject- and he may decide that the graphics are pretty impactful- both as to what we are dealing with and what the response has been.
